We Celebrate the 15th International World Water Day!

Ever since 1993, all countries of the United Nations have been asked to pay attention to the water problem. We participate in this by giving a 10% discount on our complete Aqualine and Saqua water filter systems (not on the other products and on the separate filters).

The Aqualine and SAqua water filters have been developed to imitate nature. The water is filtered through this system, provided with minerals and vitalized as it happens in nature.

You can simply order this by emailing info@essence4life.net. Please note: prices include VAT, but not shipping (*around 20 euros depending on the order size*)
